

## Prosyn@Home - Broadband Guide

### What is Broadband?

Broadband, also referred to as ADSL is a high speed 24/7 internet connection up to 45x faster than a standard dial up connection. It also allows multiple PC's to connect to the internet at the same time, by making use of a wireless or cable network. One of the great things about broadband is that it allows both Internet browsing and phone conversation at the same time.

### Broadband

- Super fast downloads
- Fast browsing
- Less waiting
- Internet always on
- More than one computer at once
- Prosyn@Home will get it installed for you

### Is it for me?

Do you have all the time in the world to spend waiting? If not Broadband most definitely is for you. Time is precious whether at work or just having fun! Music, pictures, e-mails, and files can be downloaded or transferred fast and reliably. Why wait forever for web pages to load? Why wait your turn to get online? With a broadband network connection the whole family can enjoy the benefits of high speed connection at the same time. Our staff at Prosyn@Home are all qualified to quickly and reliably install all your broadband and network needs. Whether it is to set up your broadband on one or more computers so the whole family can browse or play at the same time. Prosyn@Home can also help you setup the connection to the broadband to be safe and virus free!

### Where do I get it?

If you would like Broadband installed in your home Prosyn can contact and liaise with an Internet service provider on your behalf, secure the best option for your needs and install all relevant software and hardware needed for the best experience possible. If you don't want to shop around let Prosyn take the strain! Our experienced engineers will have you up and surfing safely in no time. Give us a call today and let us get you on the way to the future in internet.
